

About us

Our Company specializes in several areas of work. We currently work for respected companies in the aerospace, pharmaceutical, cold climate technology, and mechanical engineering industries.

As an engineering company, Oeno Technik designs and constructs top-of-the-line machines. Oeno Technik's wire hood production machine is a prototype of its kind, producing caps (agrafes and strap wirehoods) for Champagne, sparkling wines, Prosecco, and cider. Our system allows us to offer a wide range of products with personalized adjustments to the closures. The four-post-wirehoods (agrafes) and galvanized steel wire (black, gold and zinc) are available with or without a lid.

By utilizing our technical abilities and professionalism, we will find an individualized and efficient solution for every customer.
